Open to opening slots. Self-contained: Regan brings everything, sets up quickly, plays to the time slot and clears the stage fast. A good way to start a night: the room settles in and starts listening.

About

reganbogen is Regan Heckscher, a multi-instrumentalist percussionist. Alone on stage, Regan builds each piece in circles: a vibraphone figure, then marimba, synthesizer, voice and hand percussion, looped and layered until the room is inside it. Field recordings run underneath: birdsong and other sounds Regan gathers from daily life.

A reganbogen set works more like a ritual than a concert. It is slow, sincere and hypnotic, and it asks the audience to arrive. Regan is also a stop-motion animator, and some shows include an original film projected behind the instruments. Regan also plays in other Louisville bands and appears on other artists' records.

The name comes from *Regenbogen*, the German word for rainbow.

> After a hard day stuck inside their own head, one listener said the set brought them back: present, engaged and intentional again.
